

CLAIMS

WHAT IS CLAIMED IS:

1. A novelty comprising:

2 a central fan member defining a body representative of an
animal or the like and having at least one support to rotatably
4 mount a fan; a lightweight fan rotatably supported from said at
least one support and adapted to rotatively move subject to fluid
6 impingement thereon and including a head member representative
of the animal or the like in whimsical configuration.

2. The novelty in accordance with Claim 1 wherein an additional

2 spaced apart support is operatively connected to said fan.

3. The novelty in accordance with Claim 2 which includes other

2 appendages representative of said animal or the like.

4. The novelty in accordance with Claim 3 which includes a stand

2 operatively connected to said central fan member.

5. The novelty in accordance with Claim 4 wherein said body is

2 made of mesh-like material so said fan is visibly discernable.

6. A novelty having a fan member defining an enclosure and having
2 at least one support to rotatably mount a fan; a light weight fan rotatably supported
from said at least one support and adapted to rotatively move subject to fluid
4 impingement thereon, said central fan member being fabricated of a see-through
material and including a support for said novelty.

7. The novelty in accordance with Claim 6 wherein said see-through
2 material is mesh-like material and said fan member is configured to represent the body
of an animal or the like.

8. The novelty in accordance with Claim 7 wherein an additional
2 spaced-apart support is operatively connected to said fan.

9. The novelty in accordance with Claim 8 wherein said fan member
2 is centrally disposed and includes appendages representative of said animal or the like.

10. The novelty in accordance with Claim 9 wherein said support is
2 plate-like in configuration.
